In connection with this distribution expansion, Peptonic has received a purchase order from Apoteket AB worth 440,000 SEK.

From the CEO

Continued focus on the launch and marketing of VagiVital® summarizes the first quarter of the year in Peptonic. In addition to expanding the distribution to more pharmacies and e-commerce platforms, significant investments were made in bringing the VagiVital® message to the customers and users. The production of an appealing and captivating TV commercial was a major investment.

Judging by the monthly sales development, the marketing efforts seem to have been effective. The feedback from VagiVital® users has been very positive. A customer survey in January concluded that 89 percent of the respondents that had used VagiVital® for two months or longer had experienced significant symptom relief. 85 percent of the respondents said that they would recommend the product to a friend. These positive responses by VagiVital® users give great confidence and guidance in view of future marketing activities.

Among pharmacy chains and e-commerce platforms the interest in VagiVital® has grown with time. At the end of the period VagiVital® could be purchased at these outlets; the 30 largest retail pharmacies of Apoteket AB and on Apoteket AB's webshop, Apoteket Hjärtat's webshop, Apoteksgruppen's 40 franchise pharmacies (on order), and on the following on-line pharmacies; Apotea.se, apohem.se, apotek365, meds.se, and netoteket.se. Since then, the distribution has expanded further. Webshops for the Danish and Norwegian markets will open soon. This to facilitate entry of these markets in a similar manner as in Sweden, that is, through the pharmacy chains. Activities to create traffic to these webshops will be performed based on market size and discussions with potential local distributors.

The preparations for a clinical study with women that have undergone treatment for a hormone dependent cancer are under way. A large portion of these women are suffering from vaginal dryness, but they cannot use hormone based treatments. Hence, the objective of this study is to demonstrate that VagiVital® is a safe and effective alternative treatment to hormones. An application to the concerned ethics committee has been submitted.

We also plan to submit a 510k registration application to the US FDA before year end. A gap analysis has been completed to find out what additional documentation needs to be developed on VagiVital® before such submission.

The 'on-tap' financing facility according to the Recall Capital agreement generated 2.7 MSEK during the period. According to this arrangement, Recall Capital sells shares, borrowed from Peptonic shareholders, on the market and the proceeds are transferred to the Company. Recall will then be compensated by shares issued directly to Recall.

Operating loss for the period was -3.185 MSEK. Sales generated 1.47 MSEK (including the order by Orion Pharma OY, Finland). Marketing costs, and cost of manufacturing, transportation and distribution amounted to approx. 2.8 MSEK.

Peptonic is in an exciting development phase and we have great expectations for the coming quarter – not least regarding the sales development of VagiVital®.

About VagiVital®

VagiVital® is a patent pending hormone free self-care product for the treatment of vaginal atrophy and vaginal dryness. The product has been tested in randomised clinical studies (vaginal atrophy) with very positive results both for objective (vaginal pH and proportion of superficial cells in the vaginal mucosa) and subjective (most bothersome symptoms, such as vaginal dryness, vaginal irritation/itching, dyspareunia and dysuria) parameters. The magnitude of symptom relief is on par with that demonstrated with e.g. prescription estrogen based products on the market today. It was very well tolerated and caused no serious adverse effects. VagiVital® was launched in Sweden as a non-prescription self-care product in July 2018.
